

METHOD FOR INDUCING AN ANTI-TUMOR AND ANTI-CACHEXIA IMMUNE
RESPONSE IN MAMMALS

Abstract of the Disclosure

5 The invention relates to inducing an immune response toward tumor associated antigens and in particular to the administration of high molecular weight isolates of autologous urine either alone, with adjuvants, or with antigen presenting cells. The antigen presenting cells have been cocultured with isolates of autologous urine. The invention can also be used to treat cachexia in cancer or AIDS patients.
